

# Michele Pasqua

## *Academic Curriculum Vitæ*

### **Assistant Professor (non-tenured)**

*Department of Computer Science - University of Verona, Italy*

## Education

- 2015–2018 **PhD in Computer Science**, *University of Verona, Italy*.  
Scholarship holder
- 2013–2015 **MSc in Computer Science and Engineering**, *University of Verona, Italy, 110/110 cum laude*.  
Curriculum: Software Engineering and Security
- 2009–2013 **BSc in Computer Science**, *University of Verona, Italy, 97/110*.  
Curriculum: General Computer Science

## PhD Thesis

- Title “*Hyper Static Analysis of Programs – An Abstract Interpretation-Based Framework for Hyperproperties Verification*”
- Supervisor Prof. Isabella Mastroeni
- Referees Prof. Antoine Miné, Prof. David A. Naumann
- Description In my PhD I have developed a methodology to verify, through static analysis, hyperproperties of computer programs. In particular, the focus is on information-flow hyperproperties, which are very pervasive in systems security. The approach is based on abstract interpretation, a very powerful formal framework for the approximation of programs' semantics. My thesis represents the first systematic approach leveraging abstract interpretation to hyperproperties verification.

## Masters Thesis

- Title “*A semantic approach to Software Watermarking – A general model based on Abstract Interpretation*”, Original: “*Approccio semantico al Software Watermarking – Un modello generale basato su Interpretazione Astratta*”
- Supervisor Prof. Mila Dalla Preda
- Description The thesis gives a semantic formulation of software watermarking. In particular, the thesis presents a general mathematical definition for watermarking systems, based on abstract interpretation. With this latter, it is possible to measure the features (e.g., resilience, secrecy, accuracy) of existing watermarking techniques and to perform comparisons between different watermarking techniques.

## PhD Schools

- 2018 **Midlands Graduate School in the Foundations of Computing Science (MGS18)**, *University of Nottingham, UK*.
- 2017 **Italian Summer School of Logic**, *The University of Milan, Italy*.
- 2016 **Security and Trust of Next Generation Enterprise Information Systems**, *FBK – Bruno Kessler Foundation, Italy*.
- 2014 **International Summer School on Information Security and Protection (ISSISP14)**, *University of Verona, Italy*.

*Via Legnago 29/B – Verona (VR), 37134, Italy*

## Teaching and Supervising

### Teaching

- 2022 **Lecturer and Instructor**, *University of Verona*, Italy, “Training program in cybersecurity”.  
CyberChallenge.IT
- 2021/2022 **Professor (Course Coordinator)**, *University of Verona*, Italy, Course: “Informatics and multimedia production” (INF/01).  
MSc in Publishing and Journalism
- 2021 **Lecturer and Instructor**, *University of Verona*, Italy, “Training program in cybersecurity”.  
CyberChallenge.IT
- 2020 **Lecturer and Instructor**, *University of Verona*, Italy, “Training program in cybersecurity”.  
CyberChallenge.IT
- 2017/2018 **Teaching Assistant**, *University of Verona*, Italy, Course: “Logic” (INF/01).  
BSc in Computer Science
- 2016/2017 **Teaching Assistant**, *University of Verona*, Italy, Course: “Programming for Bioinformatics” (INF/01).  
BSc in Bioinformatics
- 2015/2016 **Teaching Assistant**, *University of Padova*, Italy, Course: “Automata and Formal Languages” (INF/01).  
BSc in Computer Science

### Supervising

- 2020/2021 **Projects Supervisor**, *University of Udine*, Italy, Course: “Distributed Systems” (INF/01).  
MSc in Computer Science
- 2020/2021 **Projects Supervisor**, *University of Verona*, Italy, Course: “Cyber-Security for IoT” (INF/01).  
MSc in Computer Engineering for Robotics and Smart Industry
- 2018 **BSc Thesis Co-Supervisor**, *University of Verona*, Italy, Student: Jenny Bonato.  
Model Checking for Security – Extending Temporal Logic in Order to Deal with Information Flows  
*Supervisor*: Prof. Isabella Mastroeni
- 2018 **BSc Thesis Co-Supervisor**, *University of Verona*, Italy, Student: Michele Pasetto.  
Secure Multi-Execution – An Elegant Enforcement Mechanism for Information Flow Security  
*Supervisor*: Prof. Isabella Mastroeni

---

## Research

My main research interests are in the field of formal methods for security and programming languages; with particular attention to program verification and semantics, code protection, malware detection, compilation, distributed systems and functional testing. Some keywords:

- |   |   |
|---|---|
| ○ abstract interpretation                 | ○ software watermarking and obfuscation |
| ○ property and hyperproperty verification | ○ metamorphic malware                   |
| ○ system semantics                        | ○ event-driven architecture             |
| ○ (modular) static analysis               | ○ attribute-based communication         |
| ○ language-based security                 | ○ distributed systems                   |
| ○ type systems                            | ○ REST APIs                             |
| ○ process algebra                         | ○ black-box testing                     |
| ○ bisimulation theory                     | ○ security testing                      |
| ○ IoT and CPS security                    | ○ statistical model-checking            |

Actually, I am exploring new research topics, such as the security/correctness of blockchain-based programs (smart-contracts) and the verification of quantum programming languages.

### Indicators

## Past positions

- 2021 **Postdoctoral Researcher**, *University of Udine*, Italy, Department of Mathematics, Computer Science and Physics.  
Prof. Marino Miculan
- 2019 – 2020 **Postdoctoral Researcher**, *University of Verona*, Italy, Department of Computer Science.  
Prof. Massimo Merro

## Participation in Research Projects

- 2021 **Research assistant**, *Joint project “Build Trust Proof of Concept” (2021)*, Funded by the University of Verona and Build Trust Srl”, Coordinator: Prof. Franco Fummi.
- 2020–2022 **Research assistant**, *PRIN project “IT MATTERS - Methods and Tools for Trustworthy Smart Systems” (2019-2022)*, Funded by the Ministry of Education, University and Research (Italy)”, Coordinator: Prof. Rocco De Nicola.
- 2019–2022 **Research assistant**, *PRIN project “ASPRA - Analysis of Program Analyses” (2019-2022)*, Funded by the Ministry of Education, University and Research (Italy)”, Coordinator: Prof. Roberto Giacobazzi.
- 2018–2020 **Research assistant**, *Joint project “SAINTS - Security Static Analysis for Android Things” (2018-2020)*, Funded by the University of Verona and JuliaSoft Srl”, Coordinator: Prof. Massimo Merro.
- 2018–2020 **Research assistant**, *Project “ARES - Analyzing Modern Software Security” (2018-2020)*, Funded by the University of Verona”, Coordinator: Prof. Isabella Mastroeni.
- 2018 **Visiting researcher**, *ERC project “MOPSA - Modular Open Platform for Static Analysis” (2016-2021)*, Funded by “Consolidator Grant Agreement 68139”, Coordinator: Prof. Antoine Miné.
- 2016–2017 **Research assistant**, *MIUR project “FACE - Formal Avenue for Chasing malwarE” (2014-2018)*, Funded by FIRB “Futuro in ricerca 2013”, Coordinator: Dr. Mila Dalla Preda.

## Committees and Reviewing

- 2022 **Program Committee Member**, *22<sup>nd</sup> IEEE International Working Conference on Source Code Analysis and Manipulation (SCAM 2022)*, Research Track, October 3-4, 2022.  
Limassol, CY
- 2022 **Proceedings and Local Chair**, *22<sup>nd</sup> IEEE International Working Conference on Source Code Analysis and Manipulation (SCAM 2022)*, Research Track, October 3-4, 2022.  
Limassol, CY
- 2022 **Guest Reviewer**, *Automated Software Engineering*, Journal, Springer.
- 2019 **Program Co-Chair**, *11<sup>th</sup> International Conference on Advances in System Testing and Validation Lifecycle (VALID 2019)*, Special Track “Formal Methods for Software Analysis and Verification”, November 26, 2019.  
Valencia, ES
- 2019 **Guest Reviewer**, *IEEE Transactions on Information Forensics and Security*, Journal, IEEE Signal Processing Society.

## Public Talks

### Conference Talks

- Dec. 8, 2021 **On the Security and Safety of AbU Systems**, *19<sup>th</sup> International Conference on Software Engineering and Formal Methods*, (virtual).
- Sep. 10, 2021 **A Calculus for Attribute-based Memory Updates**, *18<sup>th</sup> International Colloquium on Theoretical Aspects of Computing*, Nur-Sultan, KZ (virtual).
- Feb. 6, 2020 **Friendly Fire: Cross-App Interactions in IoT Platforms**, *4<sup>th</sup> Italian Conference on Cyber-Security*, Ancona, IT.
- Oct. 8, 2019 **An abstract domain for objects in dynamic programming languages**, *8<sup>th</sup> International Workshop on Numerical and Symbolic Abstract Domains*, Porto, PT.
- Jun. 27, 2019 **Securing Cross-App Interactions in IoT Platforms**, *32<sup>th</sup> IEEE Computer Security Foundations Symposium*, Hoboken, USA.
- Apr. 10, 2019 **Abstract Interpretation of Information Flows: A Sound Static Analyzer for Non-Interference**, *34<sup>th</sup> ACM/SIGAPP Symposium On Applied Computing*, Limassol, CY.
- Aug. 30, 2018 **Verifying Bounded Subset-Closed Hyperproperties**, *25<sup>th</sup> Static Analysis International Symposium*, Freiburg im Breisgau, DE.
- Sep. 27, 2017 **On topologies for (hyper)properties**, *18<sup>th</sup> Italian Conference on Theoretical Computer Science*, Naples, Italy.
- Sep. 1, 2017 **Hyperhierarchy of Semantics: A Formal Framework for Hyperproperties Verification**, *24<sup>th</sup> Static Analysis International Symposium*, New York, USA.
- Aug. 29, 2016 **Software Watermarking: A Semantics-based Approach**, *7<sup>th</sup> International Workshop on Numerical and Symbolic Abstract Domains*, Edinburgh, UK.

### Seminars

- Nov. 11, 2019 **Semantics-based Software Watermarking by Abstract Interpretation**, *University of Verona*, Italy.  
MsC course “Software Security”
- May 3, 2019 **Semantics-based Software Watermarking by Abstract Interpretation**, *University of Verona*, Italy.  
MsC course “Software Security”
- May 2, 2018 **Hyperproperties and their verification**, *Sorbonne University*, France.  
Invited talk
- Mar. 15, 2018 **Hyperproperties and Temporal Logics**, *University of Verona*, Italy.  
PhD course “Temporal Logic”
- Nov. 22, 2017 **Semantics-based Software Watermarking by Abstract Interpretation**, *University of Verona*, Italy.  
MsC course “Software Security”
- Dec. 21, 2016 **Semantics-based Software Watermarking by Abstract Interpretation**, *University of Verona*, Italy.  
MsC course “Software Security”
- May 27, 2016 **Measurements in Quantum Computing**, *University of Verona*, Italy.  
Quantum Computing Seminars
