

Michele Pasqua

Academic Curriculum Vitæ

Postdoctoral researcher

Department of Mathematics, Computer Science and Physics -
University of Udine, Italy

Education

- 2015–2018 **PhD in Computer Science**, *University of Verona*, Italy.
Scholarship holder
- 2013–2015 **MsC in Computer Science and Engineering**, *University of Verona*, Italy, 110/110 cum laude.
Curriculum: Software Engineering and Security
- 2009–2013 **BsC in Computer Science**, *University of Verona*, Italy, 97/110.
Curriculum: General Computer Science
- 2013 **Internship at Department of Computer Science**, *University of Verona*, Italy.
Topic: web applications security

PhD Thesis

- Title “Hyper Static Analysis of Programs – An Abstract Interpretation-Based Framework for Hyperproperties Verification”
- Supervisor Prof. Isabella Mastroeni
- Referees Prof. Antoine Miné, Prof. David A. Naumann
- Description In my PhD I have developed a methodology to verify, through static analysis, hyperproperties of computer programs. In particular, the focus is on information-flow hyperproperties, which are very pervasive in systems security. The approach is based on abstract interpretation, a very powerful formal framework for the approximation of programs’ semantics. My thesis represents the first systematic approach leveraging abstract interpretation to hyperproperties verification.

Masters Thesis

- Title “A semantic approach to Software Watermarking – A general model based on Abstract Interpretation”, Original: “Approccio semantico al Software Watermarking – Un modello generale basato su Interpretazione Astratta”
- Supervisor Dr. Mila Dalla Preda
- Description The thesis gives a semantic formulation of software watermarking. In particular, the thesis presents a general mathematical definition for watermarking systems, based on abstract interpretation. With this latter, it is possible to measure the features (e.g., resilience, secrecy, accuracy) of existing watermarking techniques and to perform comparisons between different watermarking techniques.

PhD Schools

- 2018 **Midlands Graduate School in the Foundations of Computing Science (MGS18)**, *University of Nottingham*, UK.
- 2017 **Italian Summer School of Logic**, *The University of Milan*, Italy.

Via Legnago 29/B – Verona (VR), 37134, Italy

🌐 <http://users.dimi.uniud.it/~michele.pasqua/> • 📞 0000-0002-9475-4836

- 2016 **Security and Trust of Next Generation Enterprise Information Systems**, *FBK – Bruno Kessler Foundation*, Italy.
- 2014 **International Summer School on Information Security and Protection (ISSISP14)**, *University of Verona*, Italy.

Teaching

- 2021 **Guest Lecturer**, *University of Verona*, Italy, Course: “Training program in cybersecurity”.
CyberChallenge.IT
- 2020 **Guest Lecturer**, *University of Verona*, Italy, Course: “Training program in cybersecurity”.
CyberChallenge.IT
- 2017 – 2018 **Teaching Assistant**, *University of Verona*, Italy, Course: “Logic”.
Bsc in Computer Science
- 2016 – 2017 **Teaching Assistant**, *University of Verona*, Italy, Course: “Programming for Bioinformatics”.
Bsc in Bioinformatics
- 2015 – 2016 **Teaching Assistant**, *University of Padova*, Italy, Course: “Automata and Formal Languages”.
Bsc in Computer Science

Supervising

- 2021 **Projects Supervisor**, *University of Udine*, Italy, Course: “Distributed Systems”.
Msc in Computer Science
- 2021 **Projects Supervisor**, *University of Verona*, Italy, Course: “Cyber-Security for IOT”.
Msc in Computer Engineering for Robotics and Smart Industry
- 2018 **BsC Thesis Co-Supervisor**, *University of Verona*, Italy, Student: Jenny Bonato.
Model Checking for Security – Extending Temporal Logic in Order to Deal with Information Flows
Supervisor: Prof. Isabella Mastroeni
- 2018 **BsC Thesis Co-Supervisor**, *University of Verona*, Italy, Student: Michele Pasetto.
Secure Multi-Execution – An Elegant Enforcement Mechanism for Information Flow Security
Supervisor: Prof. Isabella Mastroeni

Research

My main research interests are in the field of formal methods for security and programming languages; with particular attention to program verification and semantics, code protection, malware detection, compilation, distributed systems and functional testing. Some keywords:

- abstract interpretation
- property and hyperproperty verification
- system semantics
- (modular) static analysis
- language-based security
- type system
- process algebra
- IoT and CPS security
- software watermarking and obfuscation
- metamorphic malware
- event-driven architecture
- attribute-based communication
- distributed systems
- REST APIs
- black-box testing
- statistical model-checking

Actually, I am exploring new research topics, such as the security/correctness of blockchain-based programs (smart-contracts) and the verification of quantum programming languages.

Participation in Research Projects

- 2020–Present **Research assistant**, PRIN project “IT MATTERS - Methods and Tools for Trustworthy Smart Systems” (2019–2022), Funded by the Ministry of Education, University and Research (Italy)”, Coordinator: Prof. Rocco De Nicola.
- 2019–Present **Research assistant**, PRIN project “ASPRA - Analysis of Program Analyses” (2019–2022), Funded by the Ministry of Education, University and Research (Italy)”, Coordinator: Prof. Roberto Giacobazzi.
- 2018–2020 **Research assistant**, Joint project “SAINTS - Security Static Analysis for Android Things” (2018–2020), Funded by the University of Verona and JuliaSoft Srl”, Coordinator: Prof. Massimo Merro.
- 2018–2020 **Research assistant**, Project “ARES - Analyzing Modern Software Security” (2018–2020), Funded by the University of Verona”, Coordinator: Prof. Isabella Mastroeni.
- 2018 **Visiting researcher**, ERC project “MOPSA - Modular Open Platform for Static Analysis” (2016–2021), Funded by “Consolidator Grant Agreement 68139”, Coordinator: Prof. Antoine Miné.
- 2016–2017 **Research assistant**, MIUR project “FACE - Formal Avenue for Chasing malwarE” (2014–2018), Funded by FIRB “Futuro in ricerca 2013”, Coordinator: Dr. Mila Dalla Preda.

Committees and Reviewing

- 2019 **Program Co-Chair**, Formal Methods for Software Analysis and Verification, Special Track of: the 11th International Conference on Advances in System Testing and Validation Lifecycle (VALID 2019), November 26, 2019.
- 2019 **Guest Reviewer**, IEEE Transactions on Information Forensics and Security, Journal, IEEE Signal Processing Society.
